The Town of Boylston joins the Central Mass. Mosquito Control service area

At the May 7, 2012 Annual Town Meeting, Boylston residents voted to join the Central Mass. Mosquito Control Project effective July 1, 2012.

The Central Mass. Mosquito Control Project offers a full service, year round program of mosquito control consisting of seven areas of service; larval mosquito control; adult mosquito control; adult mosquito surveillance & testing; wetland restoration and ditch maintenance; public education, source reduction (tire recycling) and research and efficacy.

Preliminary work before July 1, 2012 will consist of site surveys of potential mosquito larval habitat; locate pesticide exclusion areas, surveillance and testing of mosquitoes, and distribution of public educational materials in town hall offices and the town library. To exclude your property from mosquito pesticide applications, please notify the Town Clerk and the CMMCP office as soon as possible.

For more information on mosquito biology, our program and/or the pesticide exclusion process, please call CMMCP at (508) 393-3055 or log on to our website at www.cmmcp.org.
