The Town of Boxborough to perform Aerial Applications in Wetlands for Mosquito Larvae

The Town of Boxborough and the Central Mass. Mosquito Control Project will be conducting helicopter applications of the bacterial larvicide Bti to control mosquito larvae in mid-April, and possibly again following significant rain events later in the summer. The applications will be conducted over wetlands larger than one acre in town that have been confirmed to have mosquito larvae.

The trade name of the Bti formulation is Vectobac G (EPA Reg. #73049-10). Additional information such as a map of the proposed application, product labels and MSDS, etc. will be available at the Boxborough Board of Health office, or is now on the CMMCP website at [www.cmmcp.org](http://www.cmmcp.org). Please contact CMMCP Executive Director Timothy Deschamps at (508) 393-3055 if you have questions.
