

Natick 2011:

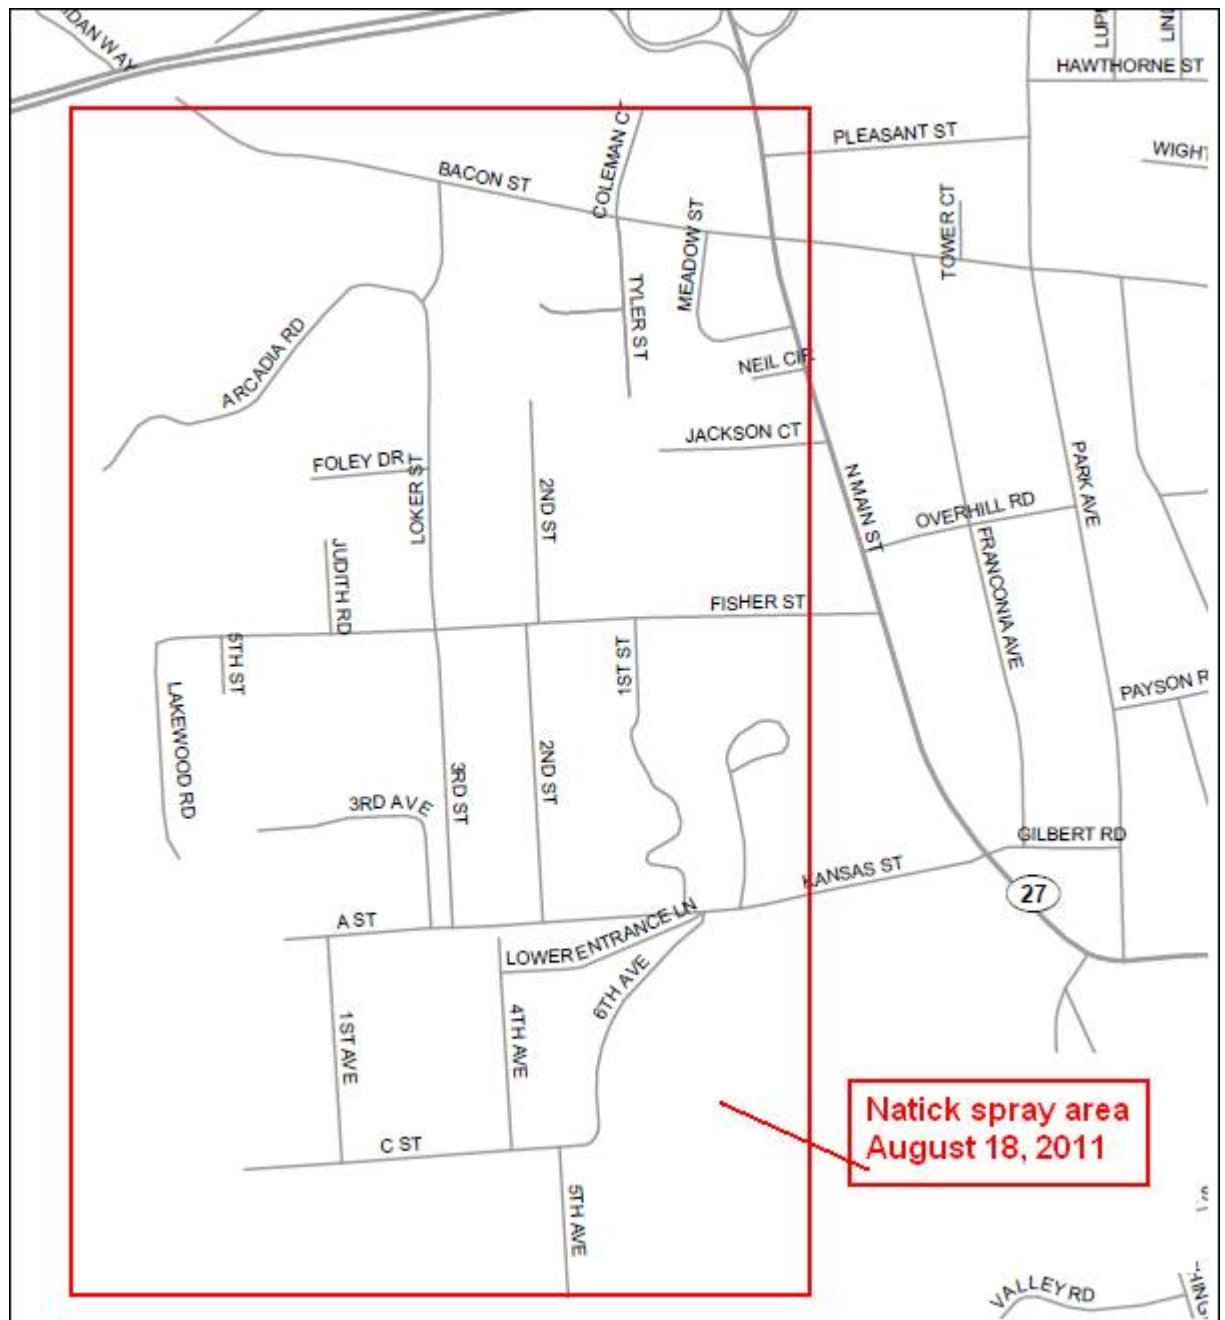

8/18/11 APPLICATION IS COMPLETE.

Mosquitoes with West Nile Virus were confirmed August 17 in a surveillance trap set by CMMCP on August 12.

CMMCP catch basin maps were checked and basins were treated in the area. A spray area has been designated for the evening of August 18; see map and street listing below. **Please note:** additional areas may be done in town by citizen's request – access may be unavailable on Natick Lab property.

Additional surveillance traps have been set in the area to gauge population densities and for additional virus testing if necessary.

Use the “Zoom” feature to make the map larger (“View” then “Zoom”) or press the plus sign (+) while holding the Control button (CTRL) on your keyboard.
