

Clinton 2016: updated 9/23/16 8:54am

Mosquitoes with West Nile Virus were confirmed September 21 in a surveillance trap set by CMMCP near the Wachusett Reservoir. Working with the Clinton Board of Health, spraying in the area was done September 22, 2016 after sunset. Catch basins were treated in this area to stop emergence of mosquito species that can carry WNV, and additional surveillance traps have been set up to gauge population density and determine if additional virus can be isolated.

It's important to note that spraying can only reduce but not eliminate the threat of mosquito-borne illness in the areas that are sprayed. That's why it's important for individuals to continue to take personal precautions against mosquito bites — both before and after any spraying is conducted.

STREET LISTING:

Arthur St	Front St	Richman St
Beacon Ct	Gage St	School St
Beacon St	Grove St	Simon Ct
Burdett St	Hastings Ct	Skyline Dr
California Ct	John St	Spring St
Chestnut St	Lane Ave	Summit St
Clinton St	Ledge Ct	Terrence Ave
Curran St	Main St	Thomas St
Dennis St	Mechanic St	Union St
Dervin Pl	Nashua St	Vineyard Ave
Dike Dr	Norman St	W Boylston St
Fairmont St	Nugent Ave	Winter St
Fairview St	Park St	Winthrop St
Franklin St	Pleasant St	

NOTE: ADDITIONAL AREAS NOT LISTED ABOVE MAY BE SCHEDULED – CHECK HERE AFTER 3PM ON SEPTEMBER 22: www.cmmcp.org/ulv.htm

Avoid Mosquito Bites

- **Be Aware of Peak Mosquito Hours** - The hours from dusk to dawn are peak biting times for many mosquitoes. Consider rescheduling outdoor activities that occur during evening or early morning. Otherwise, take extra care to use repellent and protective clothing.
- **Clothing Can Help** reduce mosquito bites. Although it may be difficult to do when it's hot, wearing long-sleeves, long pants and socks when outdoors will help keep mosquitoes away from your skin.
- **Apply Insect Repellent** when you go outdoors. Use a repellent with **DEET** (N, N-diethyl-m-toluamide), **permethrin**, **picaridin** (KBR 3023), **IR3535** or **oil of lemon eucalyptus** [p-methane 3, 8-diol (PMD)] according to the instructions on the product label. DEET products should not be used on infants under two months of age and should be used in concentrations of 30% or less on older children. Oil of lemon eucalyptus should not be used on children under three years of age. Permethrin products are intended for use on items such as clothing, shoes, bed nets and camping gear and should not be applied to skin.

Mosquito-Proof Your Home

- **Drain Standing Water** - Mosquitoes lay their eggs in standing water. Limit the number of places around your home for mosquitoes to breed by either draining or getting rid of items that hold water. Check rain gutters and drains. Empty any unused flowerpots and wading pools, and change water in birdbaths frequently. Contact **508.929.1300** if you have found an abandoned pool in your neighborhood.
- **Install or Repair Screens** - Some mosquitoes like to come indoors. Keep them outside by having tightly-fitting screens on all of your windows and doors.

Information about WNV and reports of WNV activity in Massachusetts can be found on the MDPH website at <http://www.mass.gov/dph/wnv>. Recorded information about WNV is also available by calling the MDPH Public Health Information Line at 1-866-MASS-WNV (1-866-627-7968).
